Driving Impact for Manufacturers

Lean Champion Certification

Lean is all about continuous improvement. Improving quality, efficiency, change management, workplace safety, employee engagement, *and* the bottom line. Creating and maintaining a culture of continuous quality improvement involves trained leadership who will engage the entire organization in the process. **Becoming a Lean Champion can be the first step!**

This program reviews in detail the seven principals of Lean throughout 4-weekly sessions. Receive hands-on training and one-on-one assignments pertaining to your manufacturing business. *Principles of Lean* and *Value Stream Mapping* can be scheduled as stand-alone training sessions.

Also, ask about our on-site training, consulting, and implementation services customized for your company.
