

# Advanced Manufacturing TRAINING EVENT

## ADVANCED OSHA COMPLIANCE

The 2015 OSHA injury reporting standards are triggering a large number of site inspections. An inspection triggered through an injury reporting can be expanded into emphasis programs and any other observed issues. As such, Sturgeon Consulting and the NWIRC are partnering to help you successfully prepare and complete an OSHA inspection. This important and information-packed four-hour class includes:

- Preparing a strategy for managing your next inspection
- Understanding the new injury reporting protocols
- Developing the necessary written programs and procedures needed for regulatory compliance
- How to effectively meet the required employee training topics
- How preparing for OSHA compliance can help prevent injuries and reduce liability
- Limiting liability from on-site vendors and contractors
- The most frequently cited regulatory standards
- Current emphasis programs that could impact your business
- Understanding the OSHA 300 Log
- Injury rate calculations and strategies

### For information and to register:
