Driving Impact for Manufacturers

Management Quality Tools Certification Program

Give your employees, who are responsible for quality, the tools they need for continuous improvement. Quality issues can lead to increased costs, delayed product launches, or lost revenue. This multi-day course provides a variety of resources to 1) uncover potential failures before they occur, 2) evaluate the root cause of performance problems, and 3) improve the effectiveness of both your measuring systems and quality management program.

Participants will learn how to apply each quality tool in a project benefiting their company.

1-Day of training for each of the following topics:

- **Failure Modes and Effects Analysis (FMEA) / May 3, 2016**
- **Measurement System Analysis (MSA) / May 11, 2016**
- **Root Cause Analysis (RCA) / May 18, 2016**
- **Statistical Process Control Charts (SPC) / May 24, 2016**
- **Assessing Quality System Effectiveness / June 1, 2016**

Instructor: Sara Goncus, Director of Training and Development with Operations Strategy Consulting, LLC.

Sara holds a B.S. in Computer Engineering from the University of Pittsburgh, is a certified Lean Six Sigma Green Belt, an RABQSA certified QMS internal auditor, and a certified AIAG ISO/TS 16949 auditor. Prior to joining Operations Strategy, Sara worked as a Quality Assurance Engineer for Lockheed Martin at Cannon Air Force Base in New Mexico.

Special Note:

Each topic in this program can be taken as an individual training. Fee for each course is $360. Please see objectives for each course on our website.

May 3-June 1, 2016
8:00am-4:00pm
(See specific dates for each training topic.)

Erie, PA
