Driving Impact for Manufacturers

IATF 16949:2016
Internal Auditor Training

In October 2016, IATF published a revised automotive industry standard to replace ISO/TS 16949:2009. The ISO 9001 requirements are now published separately from the new IATF 16949:2016 Automotive Quality Management System requirements, however they remain the foundation for the new automotive standard.

The ISO 9001:2015 standard must now be understood and utilized in conjunction with IATF 16949. For that reason, this new IATF 16949 Internal Auditor Course covers both the ISO 9001:2015 and IATF 16949:2016 requirements. This three-day course was developed to cover all requirements of both the ISO 9001:2015 and IATF 16949:2016 standards, including the new IATF 16949 requirements for Internal Auditors regarding Core Tools and Customer-Specific Requirements.

This course will include:

- Relationship of quality management system to the organizational products, services, activities and operational processes
- Applying the personal attributes necessary for the effective and efficient conduct of a QMS audit
- The purpose and applicable uses of the core tools
- Linking the core tools to IATF 16949:2016 requirements
- The importance of Customer-Specific Requirements
- How to conduct Process Flow, FMEA, Control Plans and Process Review audits

Instructor: Kevin Smith HCS, SPHR
President and Owner , VIE Associates, LLC

Kevin is a performance management consultant and certified Human Capital Strategist (HCS). He has spent the majority of his career assisting leaders in improving organizational performance and maximizing human resources.

Objectives:

- Understand the application of quality management principles in the context of ISO 9001:2015 and IATF 16949:2016.
- Understand the application of the regulations, and other considerations that are relevant to the management system, and the conduct of the audit.
- Understand the application of the principles, procedures and techniques of process based auditing.
- Understand the application of the QMS in regards to the organization's context and interested party needs and expectations.

June 13, 14, 15 -2017
