Driving Impact for Manufacturers

Lean Champion Certification

Lean is all about continuous improvement. Improving quality, efficiency, change management, workplace safety, employee engagement, *and* the bottom line. Creating and maintaining a culture of Lean continuous improvement involves trained leadership who will engage the entire organization in the process. Becoming a Lean Champion can be the first step!

Overview

This program reviews in detail the principles of Lean throughout 4-weekly sessions. Receive hands-on training and individual assignments pertaining to your manufacturing business.
