

# Cybersecurity Boot Camp

Cyber-crime is on the rise and knowledge is power when it comes to your defense. Learn how you can quickly and cost effectively address cybersecurity threats. A portion of this program is also geared to help Department of Defense (DoD) contractors understand new requirements.

## Morning Training

- How to manage IT resources to reduce risks
- Best practices using a cybersecurity framework
- Increasing cyber-awareness
- Effectively training employees
- What assets are at risk?
- Who poses a threat?
- What is your liability and associated costs?
- What should you do after a breach?

## Afternoon Training

- New cybersecurity requirements for DoD Contractors and Subcontractors (*December 2017 deadline for compliance*)
- Understanding NIST 800-171 requirements
- Safeguarding covered defense information
- What is controlled unclassified information (CUI)?
- What about DFARS and cloud computing?
- Cybersecurity incident reporting (DFARS 252.204-7012)
- Resources to assist your company with compliance
