

Advanced Manufacturing

TRAINING EVENT

AS 9100 Rev D

INTERNAL AUDITOR

The focus of this course is to give participants the competency to perform audits in accordance to the requirements of the AS9100 (Rev D) standard requirements. For manufacturers within the aerospace industry, this course provides your internal auditors the understanding of the AS9100 requirements; and how to prepare, conduct, report, and close-out an audit.

Program Content:

- The 7 Quality Management Principles
- The process approach for auditing
- The PDCA cycle and the relationship to the AS requirements
- Concepts behind risk based thinking
- Understanding of the intent associated with the elements of the AS9100 requirements
- Understanding the AS9100 requirements that are related to the scope of a defined audit
- How to properly prepare for an audit and develop audit question
- Effective interviewing techniques
- How to properly conduct an audit
- How to identify non-conformances and opportunities for improvement
- How to properly identify and report audit finding
- How to close out the audit

Instructor: Max Krug, Eminence Consulting

Krug has over 29 years experience in operations, including 16 years' consulting companies in a variety of sectors. He earned a Bachelor of Science in Industrial Engineering from Alfred University and a Master's in Business Administration from St. Bonaventure University.
