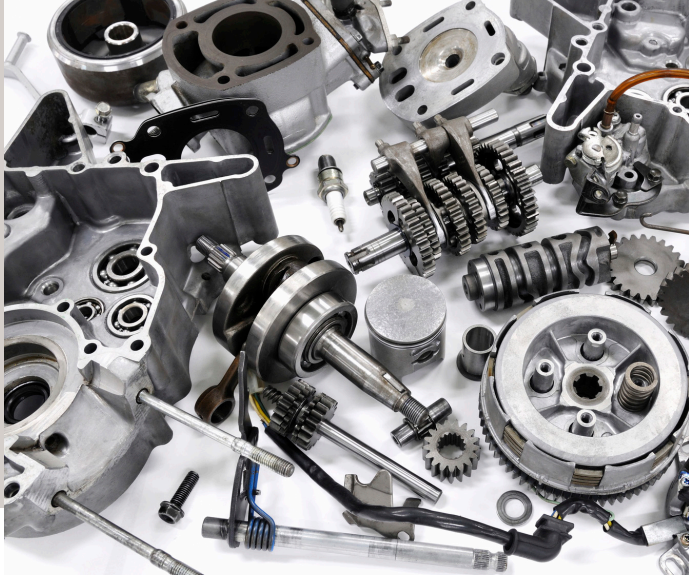
Driving Impact for Manufacturers

Machine Vision

Improving the Quality of Your Parts



Learn how to reduce costs and improve the efficiency of your production line during this hands-on workshop. You will discover the fundamentals of machine vision and see the latest in its solutions from Cognex.

COGNEX machine vision systems are unmatched in their ability to inspect, measure, identify, and guide parts. They are easy to deploy and provide reliable performance for the most challenging applications. Because of their unique tools and user-friendly software, they have been used in millions of applications around the world. Due to growing demand, Cognex greatly invests in research each year to determine the needs of the marketplace.

Don't miss this opportunity to see the latest technology!

Manufacturers registering by June 14th are eligible for the drawing to win an **iRobot Roomba Vacuum**.

NEFF™

COGNEX

Workforce Solutions for North Central PA

June 19, 2019
11:30am - 3:00pm

Red Fern
421 Old Kersey Road
Kersey, PA
