

Driving Impact for Manufacturers

Operational Excellence Workshop

Is your organization:

- Struggling to meet monthly performance goals?
- Constantly expediting orders and running too much overtime?
- Getting customer complaints for late orders or long lead-times?
- Suffering from the end of the month syndrome?
- Finding it difficult to attract and retain the right employees?
- Losing customers or have inadequate sales?

Attend this high interactive workshop to learn:

- The necessary conditions to create a high-performing organization
- The roles of leadership and customer focus
- How to measure and establish the correct performance metrics
- How to create a stable and capable delivery system
- How to identify initiatives that could achieve a 20-25% productivity improvement with your current workforce
- How to construct a strategy that achieves a competitive market advantage
- How to convert improved operational performance into a market strategy to grow sales

Bring a team!

At least one participant should be senior staff or leadership

Instructor: Max Krug, Future State Engineering

Max has over 29 years experience in operations, including 16 years' consulting companies in a variety of sectors. He earned a Bachelor of Science in Industrial Engineering from Alfred University and a Master's in Business Administration from St. Bonaventure University.
