

WHAT YOU NEED TO KNOW & DO NOW TO PREPARE FOR DoD CMMC REQUIREMENTS

Training for Non-Technical Professionals Providing Guidance to Small Business Clients

The recent NIST SP 800-171 Assessment submission requirement and the upcoming CMMC (Cybersecurity Maturity Model Certification) that will be required of all primes and subcontractors in the near future is a hot topic in DoD.

This training will answer questions such as:

- Does CMMC impact your organization?
- Are you up to date on the requirements?
- Timelines?
- Organizational impacts?
- What do you need to know and where do you begin?
- Is your organization ready?

SPEAKERS

Scott Dawson, President & Co-Founder
Core Business Solutions

Zane Patalive, Owner
Real IT Care

Hear from IMC Partners and Industry Professionals in IT and Management Consulting on the current state of CMMC and the impact it has for your organization currently and in the future. Our speakers will cover this complicated and confusing topic in a way that is understandable for any organization in the DoD supply chain - both prime and sub-contractors - and what it means for you.
