

IMPROVE

IATF 16949:2016 Internal Auditor

This three-day course was developed to cover requirements of both the ISO 9001:2015 and IATF 16949:2016 standards, including the requirements for Internal Auditors regarding core tools and customer-specific requirements.

This course will include:

- Relationship of quality management system to the organizational products, services, activities and operational processes
- Applying the personal attributes necessary for the effective and efficient conduct of a QMS audit
- The purpose and applicable uses of the core tools
- Linking the core tools to IATF 16949:2016 requirements
- The importance of Customer-Specific Requirements
- How to conduct Process Flow, FMEA, Control Plans and Process Review audits

Instructor: Max Krug, Future State Engineering

Max has over 29 years experience in operations, including 16 years' consulting companies in a variety of sectors. He earned a Bachelor of Science in Industrial Engineering from Alfred University and a Master of Business Administration from St. Bonaventure University.
