

Supply Chain 101

Supply Chain 101 provides participants with a high-level knowledge base of and the 'must have' processes for successful execution of inventory & supply chain management. Participants will learn the components that come into play and understand how to link them to their company's strategic, operating, and tactical plans. Participants will have access to leading supply chain and manufacturing experts who have executed these strategies in numerous organizations.

What You'll Learn:

This course will help participants to:

- Articulate and understand the components of supply chain planning.
- Understand and apply the principles of demand & capacity planning.
- Learn to how to create risk & cost-based controls for effective inventory management.
- Experience creating and using inventory & supply chain key performance indicators.
- Perform supply chain mapping.
- Learn best practice Supplier Scouting techniques.
- Learn what implementing a formal Inventory Management and Supply Chain program entails

Cost: Free of Charge*

Format: Virtual - Live Instructors
