Driving Impact for Manufacturers

# AS9100D Internal Auditor

## Overview

The focus of this course is to give participants the competency to perform audits in accordance to the requirements of the AS9100 (Rev D) standard requirements. For manufacturers within the aerospace industry, this course provides your internal auditors the understanding of the AS9100 requirements; and how to prepare, conduct, report, and close-out an audit.

**Program Content:**

- The 7 Quality Management Principles
- The process approach for auditing
- The PDCA cycle and the relationship to the AS requirements
- Concepts behind risk based thinking
- Understanding of the intent associated with the elements of the AS9100 requirements
- Understanding the AS9100 requirements that are related to the scope of a defined audit
- How to properly prepare for an audit and develop audit question
- Effective interviewing techniques
- How to properly conduct an audit
- How to identify non-conformance's and opportunities for improvement
- How to properly identify and report audit finding
- How to close out the audit
