Data That Delivers: Strategy, Quality & Insight

Dive into the intersection of strategy and data quality, exploring how the right type of data—and the processes behind it—can elevate decision-making. Participants will examine 11 common defects found in both data and its collection process, then connect data types to strategic goals. The session will progress through quality assurance, thoughtful collection, synthesis, and analysis, highlighting how clean, purposeful data becomes a powerful tool for insight.

AI in Action: Pilots, Plans & Possibilities

Kalen Fitch, Vice President of Sales & Marketing at Gasbarre Press & Automation will share their journey and best practices related to data and AI. With a background spanning engineering, operations, and customer engagement, he brings a unique perspective on how AI-enabled manufacturing can bridge today's challenges with tomorrow's opportunities.
